Dear Robert,

We would like to extend our appreciation for the excellent plenary session you presented at our 17th annual Health Care Compliance Conference.

Attached are the results of this year's attendee survey. We had 60 attendees complete the post conference survey and 98 % ranked the quality of the conference as excellent or very good. The attachment summarizes the responses of the attendees in regards to the conference overall as well as your speaker specific evaluation. As such, the first few slides address the overall conference objectives and are followed by speaker specific detail and ends with suggestions for next year's event. Please note that your survey may appear to be out of order or missing some pages. We removed the other speaker specific pages for their survey responses. As you can see from the attendee's remarks, your "How the Immortal Words of Game Show Host Richard Dawson 'Survey Says' – Means Only Increased Risk of Stark Liability under FCA Cases" session was well received and 92% ranked this session as excellent or very good.

On behalf of the rest of the conference planning committee and the conference participants, we thank you for your time and efforts in creating and presenting this session that helped to make this conference a success. We also enjoyed working with you on the planning and execution of your presentations throughout the year. Please feel free to contact us if you have questions or concerns on the survey responses.

Thank you again and Happy Holidays to you and yours!

Best regards,

Paul
